Customer	FPT Corporation.
Description	Application for FPT staff only, which used for FPT technology events tracking, published on CH Play.
My position	Developer (Mobile – Flutter).
My responsibilities	<ul style="list-style-type: none">- Development base on detail design.- Bug fix.- Report my team's working progress and review code.
Technologies used	<ul style="list-style-type: none">- Flutter.- Postman.- Fork.- Gitlab.

My own projects

Movie app

Description	- A simple movie application, written in MVVM architectural design pattern using Provider. - Call api from The Movie DB services (https://www.themoviedb.org/).
My position	Developer (Mobile – Flutter).
Github link	https://github.com/Hoangvu75/movie_app_flutter_mvvm
Technologies used	- Flutter. - Github. - Postman.

Social network

Description	Social network application, to add friend, follow, interact, chat and contact with others.
My position	Developer (Mobile – Android).
Github link	https://github.com/Hoangvu75/SocialNetwork
Technologies used	- Kotlin. - Github. - Firebase.

Weather forecast

Description	- Application to get information of weather in every city on world. - Call api from Open Weather Map services (https://openweathermap.org/).
My position	Developer (Mobile – Android).
Github link	https://github.com/Hoangvu75/Weather-forecast
Technologies used	- Kotlin, Java core. - Github.

Chat application

Description	- Application to contact and chat with friends.
My position	Developer (Mobile – Android).
Github link	https://github.com/Hoangvu75/Chat-app
Technologies used	<ul style="list-style-type: none">- Kotlin.- Github.- Firebase.

Chat application 2

Description	- Another application to contact and chat with friends, and online video call.
My position	Developer (Mobile – Flutter, Backend – Node.js).
Github link	https://github.com/Hoangvu75/chatapp-flutter-frontend
Technologies used	<ul style="list-style-type: none">- Flutter.- Github.- Firebase.- Node.js, Express.js, MongoDB, Socket.io.- Postman.
